

15-Ton Fixed Height Crane

The 15-ton fixed height is our highest capacity Wallace Crane. This crane provides users with a high-capacity lifting solution and can be an economical alternative to a custom overhead system. This crane is sold only with V-groove casters and is designed to run on inverted angle-iron track. We strongly recommend that you consider adding a power drive unit for applications where you need to move the crane. Most of these cranes are customized for particular applications. Available accessories include hoists, trolleys, track, and power drive options.

Product Features

- I-beam spans from 15' - 35'
- Fixed height and caster frame spread
- Custom heights available up to 23'
- Equipped with (4) 10" diameter steel V-groove casters designed to run on angle-iron track
